

## **Part-time Job for UCLA undergraduate Computer Science majors**

We are a vibrant, progressive Radiation Belt Modeling group (<http://rbm.epss.ucla.edu/>) in the UCLA Department of Earth, Planetary, and Space Sciences. We are looking for enthusiastic undergraduate students to join our team. It will be a good chance for you to be involved in cutting-edge research.

Your tasks may include: writing and testing scientific codes, plotting and visualizing data, maintaining and writing documentation for scientific data and models, website development and maintenance, public outreach activities, some server maintenance, and contributing to a team environment. You will be able to create your own working schedule to fit your study load, although a minimum commitment of 10 hours per a week is required. Generally the following items are required, however learning on the job is also encouraged:

- Experience in object oriented programming
- Working knowledge of Matlab, C++ (desirable)
- Working knowledge of Linux operating systems (basic ssh commands)
- Must be able to commit 10 - 20 hours a week
- Organization skills and willingness to learn
- Ability to work in a group environment
- Positive attitude and punctuality

Please e-mail your CV to [semg@epss.ucla.edu](mailto:semg@epss.ucla.edu) explaining your knowledge, experience, and any other relevant information.
