

Undergraduate Experiment Opportunity

Join Space Weather Experiment Project
“Surface Magnetic Assessment in Real Time (SMART) Network”

We are looking for undergraduate engineering students to participate in:

- Construction of magnetic sensors for space weather observations
- Web development for real-time data visualization

Off-campus work can start as early as January 2021. Interested students can send resume and UCLA transcripts (unofficial copies acceptable) to:

Dr. Peter Chi, Department of Earth
Planetary and Space Sciences
(pchi@igpp.ucla.edu)
