

Level Playing Field Institute is a non-profit based in San Francisco.

This summer we will be hosting SMASH Academy at both UCLA and USC respectively, and we are looking for talented and passionate undergraduate/graduate students to work as RA's.

SMASH focuses on promoting STEM majors/careers (science, math, engineering, and technology) for first generation, low income, high school students of color. During SMASH our scholars live and take classes on-campus for 5 weeks. I know that your organization highly values social justice, as well as diversity and fairness in education. I wanted to reach out and ask if you would support us in searching for UCLA students that would be interested in applying for Residential Assistant positions at either UCLA or USC?

For background info, here are the following links:
