

Sandia National Laboratories - Electrical Engineers

We have 5 immediate opportunities for December or Spring graduates in our **Albuquerque, NM** facility.

We are seeking **MS EE's** with interest in Electronics for Physical Security applications. This includes Electrical Engineers with interests in: Power, Sensors, Networking, RF and Electromagnetics.

If you know of any individuals that might be interested in relocating to NM, please have them contact me.

Interested applicants may apply on our Careers Page: www.sandia.gov/careers

Requisition **654903 (Electrical Sensing)** and **655650 (Power)**

These positions require the ability to obtain and maintain a Q level DOE clearance, thus requiring US Citizenship at time of hire.

What Your Job Will Be Like

We are seeking a R&D Electrical Engineers to join the DoD Security System Analysis & Engineering Department and provide support to innovative projects. Successful candidates will have a strong educational or professional background in cutting-edge electrical sensing, assessment communication, and data fusion technologies, along with seamless component integration into a high performance system.

Domestic and international travel, up to 30 to 60% of the time, is required.

Multiple positions exist within the department.
