

Westwood based B2B internet startup seeking a full stack web developer to join the founding team.

### **What we do**

SchoolLinks.com is creating the foremost Internet platform serves the need of international education. We put the tools in educator' hands to allow them to promote themselves internationally without flying overseas to set up educational fairs. We created the platform that allows consultants and educators establish partnerships and boost sales of educational programs.

We provide students with the liberty to browse through any schools in the world with the ability to do side by side comparison, calculate acceptance rate, browse amenities around, weather info, reviews, photos and all the other factors students need to make a well-informed decision.

We are a technology focused team, and are changing the way how people study abroad. We'd like to think that we are making a better world for promoting cultural exchange and global citizenship.

### **What you'll do**

- Build awesome features that will be enjoyed by millions of users worldwide.
- Collaborate on defining feature requirements, coding, testing, deploying, prototyping robust modules.
- Evaluate and integrate latest technologies and APIs.
- Contribute on design, code, specification, code review and technical documentations.

### **Qualifications:**

- PHP
- Javascript
- CSS/HTML
- GIT
- MySQL
