

Software Engineer, Irvine, CA

We are a big data unit within KPMG that provides Mass Opinion Business Intelligence to companies that need to understand consumer sentiment. We work with mostly unstructured data from across the internet, and we need an excellent candidate who is motivated and can learn quickly -- there is no shortage of things to work on here. In terms of background, we are looking for a BS in Computer Science with substantial intern experience, or a MS with significant work / intern, graduating by December. GPA > 3.5 preferred. Please see link below to apply, and for more information.
