

Sound Mind Inc. Internship

Position Description: Project Developer

All degree levels (Bachelors, Masters, PhD) are welcome to apply.

We are seeking a Mechanical Engineering student to help design and develop a new technology for baby strollers. This student needs to have a great imagination, exceptional engineering skills, and a good attitude. Student's main task would be to work with the creator of this concept to draft and produce a functioning stroller prototype. We can offer internship credit and possible pay if and when the creation is retailed. Position hours are flexible as we're willing to work around students schedule. Further information will be offered during the interviewing stages.

Please note that this is only is a four-six week program and we'd like to start as soon as possible.

To apply for this position please contact Kate at mentesanak@gmail.com

Thanks for your time.

Sincerely,

Sound Mind Inc.
