

St. Jude Medical Part-Time Position

Part-time Device Monitoring Representative (18-25 hours per week, paid) The person in this position will develop analytical tools, test systems, provide design input, and support domestic and international training. He or she will work directly with clinicians, sales reps and patients to provide technical support and troubleshooting for St. Jude Medical's remote care products. The remote care system enables patients with pacemakers to transmit medical data from their home to a secure website viewed at the doctor's office. This provides daily monitoring of patient's device and the health of their heart. The ideal candidate has outstanding interpersonal, communication and troubleshooting skills and an in-progress BS or MS in a technical field, with strong computer science skills. St. Jude Medical is a Fortune 500 company with over 14,000 employees and with products sold in more than 100 countries.
