

## Entry-Level Digital Forensics Examiners Sought In Los Angeles and San Francisco

Stroz Friedberg, an international consulting and technical services firm specializing in digital forensics and cyber-crime response ([www.strozfriedberg.com](http://www.strozfriedberg.com)), **seeks University computer science students and graduates for summer internships and full time, entry-level digital forensic examiner positions.** We have offices in Los Angeles, San Francisco, New York, Washington, D.C., Dallas, London, Boston, and Minneapolis. There are immediate openings in L.A., San Francisco, and New York.

Strong skills required in using computer science knowledge to pursue digital forensic and computer incident response investigations. Once hired, the examiners will be trained in the use of digital forensic software and analysis and in incident response (“IR”) methodologies. The examiner is expected to use his/her blend of computer science education, investigative instincts, problem-solving skills, and the Stroz-provided training on forensics and IR, to investigate a wide variety of cases. These cases involve, for example, e-forgery, theft of source code and other intellectual property, click-fraud, cyber-extortion, hacking and other forms of unauthorized access, electronic discovery, database forensics, leaks of confidential information, spoliation of evidence, and other digital risk management matters. As Stroz Friedberg is the leading digital risk management firm, we typically handle large, complex, (often) cross-border, and time-sensitive matters for major corporate, legal, and individual clients. Accordingly, our candidates should be excited about domestic and foreign travel, have excellent problem solving skills, a strong work ethic, the highest standards for their work product, work well both alone and collaboratively, and have professional appearances and spotless backgrounds. Stroz Friedberg provides competitive base salaries, overtime, bonuses, and benefits, as well as significant opportunities for training and advancement.
