

Opening for Electrical Engineering Intern

Surfx Technologies LLC
3617 Hayden Avenue, Culver City, CA 90232

Learn valuable skills to enhance your career opportunities!

Surfx is looking for a part-time electrical engineer that wishes to learn how to design and build high-tech equipment. Activities may include programming microprocessors (basic, C, C+, etc.), PCB board design, trouble-shooting microprocessor-based process equipment, and communicating results orally and in brief written reports.

Surfx is a fast growing company located in Culver City, California. We market equipment used in the manufacture of electronics, aerospace and medical devices. For more information please see www.surfxtechnologies.com.

We are looking for a motivated person with strong technical skills, who is a good communicator, and available to work while attending school at UCLA. The intern will be expected to work at least 8 hours per week at the Culver City facility.

Please provide a resume listing pertinent job experience and unofficial transcripts. The applicant should have completed at least two years of education at the University. Surfx Technologies LLC is an equal opportunity employer.

Email your application to jobs@surfxtechnologies.com.
