Company Description:

An Innovative and Cutting Edge Structural Engineering Company is looking to fill our new opening positions for its Pasadena office. Great opportunities for growth and advancement in career. Excellent work environment and training will be provided.

Duties & Responsibilities:

Projects include Seismic Retrofit and New Construction of Buildings. The positions offered for Internship and Structural Designers will allow you to obtain hands-on experience in real design. You could also be a part of our research and development department to help developing in house spreadsheets and software for structural design and analysis of buildings.

The following requirements are a must for all positions:

- MS Degree in Structural Engineering (Applicants with MS degree in progress may still apply).
- At least 85% of their courses taken shall be specifically in Structural Engineering
- Computer proficiency, experience on structural engineering software, development of spreadsheets and proficiency in MathCad are a plus.
- Verbal and written communication skills, teamwork skills and self-motivation are a must. Auto Cad knowledge or Revit Structure knowledge is a plus.
- This is an Equal Employment Opportunity
