

PROGRAMMING AND GRAPHICS DESIGN FALL 2012 INTERNSHIP

Description:

TicketMob (www.ticketmob.com) is looking for a qualified summer intern to join our sales team on its entertainment-branded verticals (LaughStub, ElectroStub and TuneStub). This person should be prepared to work in a fast-paced team environment, at a dynamic new technology start-up where creativity is key, professionalism is enforced, and a desire to learn is essential. This position will assist the chief Technology officer with various projects and tasks that will give them a well-rounded understanding of Technical operations.

Responsibilities:

- Documentation and testing new software applications
- Programming in Adobe ColdFusion
- Database Development in Microsoft SQL Server 2008, including stored procedures, views and table designs
- Converting Photoshop files to XHTML and CSS
- Assessment of new application ideas
- Develop applications(coding, programming)
- Website development strategy and execution
- Brainstorm and mock up design ideas
- Interview beta testers

Requirements:

TicketMob is looking for an undergraduate student in the Los Angeles area who is majoring in Computer Science/Network Engineering, Engineering or Graphics Design. Applicants should have excellent analytical and math skills, with the ability to work in teams.

Time Commitment:

Minimum 15-20 hours per week, unpaid but will receive college credit. Preferred attendance of at least 4 hours per day 3-4 days per week, however, will remain flexible in consideration of class and/or work schedule. Start date: August/September
