

WE'RE LOOKING FOR A ROCKSTAR INTERN!

Have you ever dreamed of being involved in a cutting edge project that will change the face of travel as we know it? Do you have skills involved in developing Android & PHP apps and you want to put them to good use? You went into Computer Science imagining you'll live the Digital Nomad lifestyle and work from wherever you wish in the world?

Then look no further! YOU might be exactly what we're looking for! Help us bring REVEL to life!

REVEL is our user friendly chat-bot that will be making it possible to users all around the world to book their perfect travel experience in Barcelona, Bangkok or Bali, via The Revolver Life app we're currently developing. With REVEL's help, our users will live the most exciting experiences and will be enticed to inspire others in turn by sharing their fun and unique adventures with the other users of the platform.

We want REVEL to become an AI genius, capable of tackling complex problems within NLP (to understand and reply to even the most ambiguous human messaging with empathy and provide real value). REVEL will be able to learn - choosing the best hotel, accommodation, transportation, and activities automatically from 3rd party API's to provide highly personalized experiences for Digital Nomads

The Revolver Life's values are rooted in the risk-taking actions that add value to both our users and the team. We believe that our users and our teams only grow once they are comfortable with being uncomfortable so we pride ourselves in exploring new ideas and experiences while questioning the status quo. This is why we are built around trust and psychological safety for each team member to communicate and express one's desires and disappointment for greater inclusion and commitment to not only the project but to one another.

Together we will push the boundaries of tech and travel globally. The only question is: Will you be there when we do it?

IS THIS YOU?

- Product Manager (Computer Science related projects)
 - Android & PHP developer
 - AI powered Chatbot Designer
-
- HTML / PHP / Java Script / Ruby / Python/ C++
 - Logical thinking and the ability to transform technical tasks into reality
 - Great communication skills and team player - you will be working and communicating across teams
 - Proactive attitude - voice your ideas and bring them to life
 - The ability to stay on task and meet dead-lines
 - Fluent in English. Bonus points for other language skills
