

The 2013 Louis Stoke Alliance for Minority Participation (LSAMP) Research Experience at Rensselaer Polytechnic Institute is now accepting applications.

Rensselaer Polytechnic Institute in collaboration with the National Science Foundation (NSF) is proud to host the 2013 Louis Stoke Alliance for Minority Participation (LSAMP) Research Experience. This summer research program for undergraduate students brings together underrepresented minority undergraduate students in the STEM fields from various national universities to experience laboratory research under the mentorship of premier Rensselaer faculty.

This eight week program is designed to help curious and solution-oriented students gain confidence in the lab, develop enthusiasm for graduate school, cultivate a professional network, and earn attractive qualifications. Participants will also participate in professional development activities. Rensselaer is located in upstate New York, 110 Eighth Street, Troy, NY 12180.
