

## True Ventures

True Ventures is an early-stage venture capital firm in San Francisco. We're recruiting for a pair of fellowship programs—one a summer experience for rising juniors and seniors, and one a yearlong program for recent graduates.

The first program, [The True Entrepreneur Corps](#) (TEC), is a ten week Summer 2017 fellowship designed to help college students get a foot in the door in the startup world. TEC Fellows are matched with San Francisco-based companies in our 125+ company portfolio where they spend the summer working on projects appropriate to their backgrounds and interests (both technical and non-technical). Additionally, we gather the group together weekly for workshops and a speaker series to dig into the venture capital and startup processes.

The second program, [The Priya Haji Fellowship](#), is similar in intent and design to TEC. It runs for the entire 2017-2018 academic year and gives recent graduates the chance to join a startup as a full-time employee. Haji Fellows meet periodically with the True Ventures team and we expect that this Fellowship will prepare them to move on to other jobs in startups and/or venture capital.
