

SANDIA NATIONAL LABORATORIES

President Harry S. Truman Fellowship in National Security Science and Engineering

Sandia National Laboratories is seeking applicants for the President Harry S. Truman Fellowship in National Security Science and Engineering. Candidates for this position are expected to have solved a major scientific or engineering problem in their thesis work or have provided a new approach or insight to a major problem, as evidenced by a recognized impact in their field.

The Fellowship provides the opportunity for new Ph.D. scientists and engineers to pursue independent research of their own choosing that supports Sandia's national security mission. The appointee is expected to foster creativity and to stimulate exploration of forefront science and technology and high-risk, potentially high-value research and development.

Sandia's research focus areas include: bioscience, computers and information science, engineering sciences, materials science and technology, microelectronics and microsystems, and pulsed power. Additional R&D programs in support of Sandia's mission areas can be found at <http://www.sandia.gov/mission/index.html>.

Candidates must meet the following minimum requirements: U.S. citizenship, the ability to obtain a DOE "Q" clearance; a Ph.D. (3.5 undergraduate and 3.7 graduate GPA preferred), awarded within the past three years at the time of application, or completed Ph.D. requirements by commencement of appointment. Candidates must be seeking their first national laboratory appointment (pre postdoc internships excluded).

The Truman Fellowship is a three-year appointment normally beginning on October 1. The salary is \$111,200 plus benefits and additional funding for the chosen proposal. The deadline is December 5 of each year. For more information on the Fellowship and how to apply, visit our web site.
