

UCLA California Teach is now accepting applications for our Winter Quarter 2015 seminars and internships!

Right now, in the state of California, there is a huge shortage of qualified math and science teachers to teach middle and high school science. To address this issue, we offer UCLA undergraduate science, math and engineering majors the opportunity to explore teaching as a career to see if this is something that they might like to do in the future.

Specifically, we offer quarterly seminars and internships that allow UCLA students to go out to elementary, middle, and high schools to help out with science and math activities at the school, interact with kids, and observe different teachers in action.

We are offering the following courses/internships for **Winter 2015**:

- 1) **Science Education 1SL** ([Elementary School Science](#)) – 2 units, pass/no pass
- 2) **Science Education 10SL** ([Middle School Science](#)) – 2 units, pass/no pass, recommended to have taken a previous Cal Teach course
- 3) **Math 71SL** ([Elementary School Math](#)) – 2 units, pass/no pass
- 4) **Math 72SL** ([Middle School Math](#)) – 2 units, pass/no pass, must have taken Math 31A & 31B with C- or better (or equivalent).

**Each course is associated with a 3-4 hour per week internship at a local, public school (for a total of 24 hours over the quarter).

If you (or one of your friends) is interested in applying, please go to our web site to learn more about each course, and also to fill out the online application:

www.cateach.ucla.edu

Links to the applications along with other course information can be found at:

www.cateach.ucla.edu/content/online-applications

Priority application due date is **Wednesday, November 19**.

However, we will continue to accept applications until all spots are filled through the first week of Winter Quarter. Once you have filled out the online application and are accepted into the course, we will send you a PTE number (permission to enroll) through MyUCLA.

For your planning purposes, we will **also** be offering the following courses for Spring 2015:

Spring 2015:

Science Education 1SL

Math 71SL

Math 72SL

Please let me know if you have any questions.

Best regards,

Janice Daniel
