

Undergrad Intern - R&D - (RIS)

Category: Corp Svcs

Job ID: R-18716

Location: Thousand Oaks, CA

Posted Date: February 19, 2016

Amgen's 10 – 12 week internship program offers meaningful project experiences that impact patient's lives. This internship provides the opportunity for executive and social networking events and to participate in community volunteer projects while providing a competitive compensation. Relocation in the form of a transportation allowance will be provided for eligible candidates.

The Research Imaging Sciences (RIS) department at Amgen is a multidisciplinary, team-oriented preclinical imaging laboratory that supports discovery and translational research to deepen the understanding of medicines for the treatment of human diseases. To advance our mission to provide quantitative MRI, CT, PET, SPECT, and Optical imaging assays for Amgen Research & Development, we seek a motivated and energetic Undergraduate Intern to participate in cutting-edge research. The Undergrad Intern will work with RIS scientists to apply their engineering and/or computational skills, learn about medical imaging technology, and gain valuable experience in a biotech research setting.

Basic Qualifications

Amgen requires that all individuals applying for an undergraduate internship or an undergraduate co-op assignment at Amgen must meet the following criteria:

18 years or older

Currently enrolled in a Bachelor's Degree program from an accredited college or university with a 3.0 minimum GPA or equivalent

Completion of one year of study from an accredited college or university prior to the internship commencing

Enrolled in a full time Bachelor's program following the potential internship or co-op assignment with an accredited college or university

Must not be employed at the time the internship starts

Preferred Qualifications

Pursuing a Bachelor's degree in Engineering, Computer Science, Physics, Chemistry, or Life Sciences
Experience with laboratory instrumentation, computer programming (e.g., MATLAB, C++, LabView), image analysis/visualization software (e.g., ImageJ, Amira, Analyze), computer hardware, or other engineering skills

Motivated, detail-oriented, with strong written and oral communication skills
