

## About this Job

### Job description

We are looking for developers to help us create cutting edge toys, mobile games and other applications based on Augmented Reality and other future technologies. We promise that you'll experience some terrific brands, and you will never, ever get bored. We've built a company that's here to last, and we want people who are looking for a place to belong and put down roots.

Check out this small preview of what we are working on:

<http://www.triggerglobal.com/>

Come work with our young company that operates on the intersection of creative design and advanced technology to define the future of toys and games.

This is a full time salaried position in our Los Angeles office.

If you fit the role, please apply on LinkedIn or send a cover letter and your resume to us via email:
