

VC-Backed Startup Experience That Pays!

FileTrek is a new category of SaaS that solves data sprawl caused by today's highly-mobile workforce. It is a Software as a Service solution that provides complete visibility of all sharing, syncing and versioning of documents on the desktop and in the cloud.

We are looking for a 3-5 UCLA students to help test our exciting new SaaS.
In this role you will:

1. Review existing use cases
2. Develop functional testing scripts
3. Execute functional testing scripts
4. Document test results
5. Work with our product development group to ensure bugs and issues are remediated.

This is a great way to get startup experience, enhance your network and make some extra money in your spare time. We'd like your help for ~20 hours per week. You can work from our offices in the heart of downtown Los Angeles or from home.

We will staff these positions ASAP. To apply please email your resume to Ross Sonnabend, VP Operations, (rsonnabend@filetrek.com <mailto:rsonnabend@filetrek.com>).

Ross Sonnabend
Vice President, Operations
