

## Summer Team Internship Opportunities at ViaSat

**#1 PIPES- Distributed Network Management:** The PIPES (Policy Information Processing Exchange System) program requirements include the ability to synchronize disparate networks domains to facilitate ubiquitous, end-to-end data flow. Interns will focus on development of a generic "policy" based ontology as a foundation for distributed network management across legacy and advanced network domains. This will include network synchronization and demonstration of voice, data (video), burst, stream, and flow modes of operation. Basic ESB (Enterprise Service Bus) publish and subscribe discovery process will be used as input to establish network and end user device capabilities. Metrics for policy based network management will also be developed and tested. 4 CE students with knowledge of networks and network management, ESB theory, XML, SDK based development and basic communications theory. US persons welcome.

**#2 Video Demonstration Project:** Team will work with marketing and technical leads in the Government SatCom Systems business area to script, storyboard, and produce a number of video productions for use by business development leads to promote ViaSat products and capabilities. The focus will be on specific product demonstrations that can be downloaded from a secure site by interested users, posted on YouTube.com, provided to users on disk, and/or integrated into PowerPoint or other briefing software. The team will also demonstrate video animation of specific Operational Views to show how equipment will be used in targeted applications. Select training material will also be recorded and evaluated for distribution with ViaSat equipment. 1 CS, 1 CE, 1 MBA and 1 Marketing major with knowledge of video production, editing, voice over, animation, SDK based development tools, marketing and/or media. US persons welcome.

Email your resume for consideration to Salvador Rivas [srivas@support.ucla.edu](mailto:srivas@support.ucla.edu) and indicate the number (1 or 2) of the program you would like to apply towards.
