The **Wireless Health Institute at UCLA** is currently recruiting participants for our 2015 Summer Undergraduate Internship Program.

Advances in engineering and computer science are enabling the design of powerful home and mobile technologies that can augment functional independence and daily activities of people with physical impairments, disabilities, chronic diseases and the accumulative impairments associated with aging. The **Wireless Health Institute at UCLA** is a collaboration between UCLA Schools of Medicine, Nursing, Engineering and Applied Sciences, Business, the Clinical Translational Science Institute for medical research, and the Ronald Reagan UCLA Medical Center aimed at developing new technology essential to the next generation of health care.

Sample projects include:

- 1) Acoustic Environment Classification
- 2) Zero Configuration Systems
- 3) Reliable Inference
- 4) Data Collection and Predictive Analytics
- 5) Energy-aware Inferencing of Rich Contexts & Behaviors
