SUPER PROGRAMMER (WHO WANTS TO BECOME THE CTO OF A STARTUP WITHIN A FEW MONTHS!)

for

A LOS ANGELES BASED STARTUP COMPANY

WHO ARE WE?

One entrepreneur and a few international investors.

WHO IS THE SUPER-PROGRAMMER?

Ambitious, brilliant and unafraid **technical talent**, who believes that they "know it all" about coding apps and considers themselves to be a super-star who is yet to be discovered.

The super-programmer codes an app with the same ease that normal people boil an egg.

WHAT'S THE DEAL?

First - we want to hire the super-programmer to code the MVP of our app.
Later - if they prove to be made out of CTO material, we want to offer them the position.

DROP US A LINE TO GET CONSIDERED
