

Web Developer/Programmer Needed for Start-Up in Los Angeles

The Requirement

UCLA Graduate/Entrepreneur looking to collaborate with skilled, highly motivated website developer/programmer to develop a website and database system for a new, niche social networking project. The requirement is to develop a template based website with customizable home pages and profile pages and establish a process for storing and sorting through the database of registered users. Must be comfortable with many of the features of popular social networking sites with added security features for privacy of its members.

Programmers will be working alongside the concept creators as well as University Athletic Departments and specific sports programs. The goal is to create an easy to navigate, user friendly networking site with college and sports specific home pages and individual profile pages for athletic alumni. Within the network users must be able to access and sort through the database of members while only having full access to select groups of members. Creative input and ideas are welcomed and encouraged.

“Ideal” Pre-requisites (there are always exceptions to the rule)

- You are working towards your B.S., M.S. or Ph. D. in Computer Science or a related field or have graduated with any of these.
- You have experience programming websites in Java, a strong understanding of object-oriented programming and MVC Design.
- You have a working knowledge of relational databases, preferably MySQL.
- You must be a quick problem solver and thoroughly understand and use social media, web and mobile technologies.
- You must be able to work as part of a team and collaborate well with designers and concept creators. Communication is important.

What's in it for you?

Intern involvement in the early phase of development will initially warrant a small position/stake in the company and may also become a paid position with an influx of operating capital from interested Venture Capital Funds. Terms are negotiable.

Interested?

For more information regarding the group, the concept and the influential individuals who will be consulting on the project, please contact Jon Crispin at JonCrispin@gmail.com

In your email please share any website developing experience and what you would like to gain from this collaboration.
