

Website Developer and Translator

We are looking for a part time consulting position to translate our engineering-heavy content website from English to Chinese. This is an exciting entry-level job for EE major student looking to gain working experience while working from your home. Candidate will design web pages. He/she will learn and gain experience in the exciting field of search engine optimization (SEO). Candidate should be fluent in reading and writing Chinese and English. He/she should be major in Electrical Engineering and very familiar with engineering jargons (e.g. amplifier, waveform, PSRR etc.) in both English and Chinese. Web design experience is a plus.

Applicant can send resume directly to info@accelinstruments.com

Qualifications:

Senior or graduate student major in Electrical Engineering

Fluent in reading and writing Chinese and English

Fluent in engineering jargons in both English and Chinese

Able to work independently with minimum supervision

Must be self-motivated to learn website development and search engine optimization
