| WordPress and Web Developer Intern for Social Enterprise |
| Los Angeles, California |
| Starting in April or June part-time or fulltime for 3 months |
| |
| Our Mission |
| We are a new LA-based company focused on enabling women to invest in women globally. We need a talented, passionate software engineer working with us to make this happen. We're looking to grow our team with someone who shares our energy and enthusiasm for empowering women. |
| |
| Your Job |
| We are looking for an experienced WordPress and Web Developer to build the front-end/back-end of a new externally-facing app and website for C2C across the globe. This role will require an experienced developer who can work independently along with the founders to deliver working solutions. The website will include payment transfers, messaging and profiles of women leaders and businesses around the world. The site interface will need to be mobile friendly. |
| |
| This person has front-end and back-end web development skills and experience building complex WordPress sites including plugins for integration with internal and third-party systems. |
| |
| The WordPress and Web Developer will work with the founders to help build an MVP website for women. The ideal candidate has experience executing small to medium WordPress websites, building custom plugins and widgets using industry best practices. |
| |
| We are looking for an individual that is innovative and resourceful, making the most impact with the least amount of resources. |
| |
| Important: |
| <ul style="list-style-type: none">• Ability to assemble a WordPress site from a design and work with the founders to structure the site in a fashion that aligns with company goals. |
| |
