ABOUT SOMNIO LABS

Somnio Labs is an artificial intelligence start-up. Our mission is to revolutionize the $229 billion digital advertising industry[1]. We are using GANs, CNNs, and many other artificial intelligence algorithms to create advertising that is beautiful, user-friendly and minimally obtrusive advertisements. We are finding ways to preserve the economic incentive that ensures website publishers keep producing worthwhile content. We are pre-seed company and have been offered seed investments starting at $6MM+. However, we feel that accepting money would be more appropriate in 2Q2018 - 4Q2018. Major companies like Imgur, Getty Images, News Corp. and several others have expressed interest in our technology.

You haven't heard of us. We aren't a big company. We don't have fancy offices. We have no money.

We are two brothers with a passion to change the world with an artificial intelligence company. One brother finished his M.S. in Statistics at Duke University and is working in LA as an R&D Data Scientist Manager. The other brother is (still) working on his Ph.D. at Berkeley in EECS, is an NSF Fellow and has a bunch of other useless academic awards that no one cares about. Other members of the team include Columbia University faculty, Stanford alumni and an amazing UI/UX design team in Indonesia.

THE POSITION

We are looking for enthusiastic interns to work hard and learn a lot. The internship is not paid so you must be enrolled in a course the gives academic credit for internships (i.e. ENGR 195). Grades don't matter. We only care about one thing: can you code well? There is a possibility for conversion to full-time, paid positions.

REQUIRED QUALIFICATIONS:

You can code well and like to work hard.

PREFERRED QUALIFICATIONS:

You can code *really* well and *love* to work hard.

POTENTIAL PROJECTS:

Take your pick.

- Build functional, user-friendly GUIs.

- Design and build a user account system for our clients.

- Refine our browser cookie technology.

- Help design and build an AWS database architecture.

BENEFITS:

- We will provide constant feedback and buy you lunch for every milestone you meet.

- We will write great referrals and provide accessible mentorship.

- We offer a flexible work schedule and remote-work options.

INTERVIEW PROCESS:

On your resume, please only list the programming languages for which you are willing to submit to a live-coding test.

1) We will contact you and have a conversation on the phone.

2) Live coding test for 30 minutes. Use the Internet at your leisure or any book/notes/etc.

3) Expect to hear back within 7 days of the live coding test.
